Benalla P-12 College involved with Dairy Australia ‘Cows Create Careers Program’

Students from the Hands on Learning Program at Benalla P-12 College, Faithfull Campus are involved with the Dairy Australia Program ‘Cows Create Careers’.

Cows Create Careers - Farm Module is a six-week program that aims to increase the awareness of dairy industry careers in a very hands-on way. Students are educated by rearing two three-week-old calves at school and the school is provided with dairy industry curriculum for years 7 and 8 and years 9 to 11, at no cost.

Melbourne University Dookie Dairy have given Benalla P-12 College two dairy calves. Students have received education from the dairy manager on how to run a dairy and look after their calves.

Hands on Learning Teacher Pip Rowe said “We are very lucky to be able to be involved in the program. The students are extremely excited about the calves and have really gotten on board with the program, organising a 7 day feeding roster, along with learning how to feed and do health checks on the calves, to constructing and organising the bedding and housing for them”.

The project has also required the students to make a movie and a 3D model relating the dairy industry. Upon completion of the program, students and teachers will be recognised at a Presentation Finale where prizes are awarded to the winning schools and students and the finale will be held in Shepparton in November.

Principal Barbara O’Brien said, “This is a terrific program for our students as many of them have never had the opportunity to work with farm animals before. The program gives them the chance to participate in ‘hands-on’ dairy farming duties and to gain a small understanding of what dairy farming entails”.
